

Part No. **40472**

RJ-45 PORT BLOCKER KEY - PACK OF 10 BLOCKERS, GREEN

PROTECTS RJ-45 PORTS FROM UNAUTHORIZED ACCESS

DESCRIPTION

Quickly and easily block physical access to RJ-45 Network ports
Prevent users from inserting cables, devices or foreign objects without permission
Single key and 10 x RJ-45 blockers
Individual keys and pack of 20 blockers also available
2 year warranty

With the Lindy RJ-45 Port Blocker Key, the user can quickly block open network ports and easily prevent users from connecting cables, devices or inserting foreign objects without permission.

This helps protect against unauthorised access to a network or system, as well as preventing unintentional or malicious damage to ports. It can also act as a visual cue, showing inactive or disconnected ports, ideal for use in schools, office or other public sector environments.

The semi-permanent RJ-45 Port Blocker is made up of a moulded plastic blocking cap that plugs securely into the RJ-45 port with a special insertion key. The blocker latches into the RJ-45 just as a network cable would and remains in place until removed using the insertion key.

To use, simply attach a blocker to the key and plug it into the port. Hold the blocker in place and pull away the Key. To remove simply insert the Key back into the blocker until it 'clicks' and pull it away.

Security Note: The Port Blockers will only act as a basic physical & visual deterrent to tampering. It will not prevent a determined attacker, intent on gaining physical access to a RJ-45 port.

Please note: this key is only compatible with the corresponding colour of port blocker
