Introduction

Thank you for purchasing the LINDY Wireless Audio Extender. This Wireless Audio Extender enables you to wirelessly transmit music from your PC or Notebook to speakers located in another room or to headphones as you move around.

Features

- Proprietary 2.4GHz Wireless solution
- Easy system expansion with stereo sound support
- Plug and play, quick and convenient use, no driver / software installation
- Low power consumption / Low audio noise
- Volume controlled through your computer or manually on the adapter

Package Contents

- Wireless Audio Extender Receiver
- Wireless Audio Extender Transmitter Dongle
- Neckband
- Printed LINDY manual, English
- Battery, Type AAA
- Multi Country Switching PSU, 5V DC, 1A, positive polarity

Installation

Caution: Do not connect the external power adaptor when a battery is inserted in the Receiver.

1. Insert the Transmitter Dongle into an available USB port on your computer, the Power / Association LED will begin to blink.
2. Connect headphones or speakers to the Audio Output port of the Receiver.
3. Insert a battery or connect the power adapter to the Receiver and power it on by pressing the PWR Button for 3 seconds, the Power / Association LED will begin to blink.
4. To associate the transmitter and receiver units press the Pairing button on the Transmitter for 3 seconds, then press the Volume Control button on the Receiver until you hear a repeated beep from the headphones or speakers you have connected.

5. The pairing process is now complete and you can start to use the Wireless Audio Extender.

Specification

Item	Description	
Interface	Tx USB RF Dongle	USB Type A Male
	Rx Audio Output	3.5mm Stereo Audio Jack Female
	Rx Power	DC Power Jack
RF Band	2.4 GHz	
RF data rate	Up to 2 Mbps , GFSK modulation	
Audio Output	2 channel Audio Out	
Sample rate	48KHz with 16-bit downstream	
Audio Compliance	USB 1.1 full speed specification at transfer rate to 1.5 / 12 Mbps	
	Supports LPCM and Compressed format 16-bit 2-channels	
Tx Power Mode	Bus-powered	
Rx Power Supply	Input : AC 100-240V ; Output : DC 5V /1A	
	AAA 1.5V battery x 1	
Power consumption	Rx less than 50mA @ 2.5V	
LED	Blinking when powered on , lights up when data transfer between Tx and Rx	
Operational Range	Up to 45 metres	
Operating System Support	Windows® 2000, XP , Vista™ and Windows® 7, Mac OS X v10.x or higher	
Working Environment	Operating Temperature	10~40 degrees (Celsius)
	Storage Temperature	0~70 degrees (Celsius)
	Humidity	0 ~ 80%
Dimensions	Wireless Audio Dongle	52 (L) x 19 (W) x 10 (H) (mm)
	Wireless Audio Box	58 (L)x 55 (W) x14 (H) (mm)

Certification

CE Certification

This equipment complies with the requirements relating to Electromagnetic Compatibility Standards EN55022/EN55024 and the further Standards cited therein.

FCC Certification

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

You are cautioned that changes or modification not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

WEEE (Waste of Electrical and Electronic Equipment), Recycling of Electronic Products

United Kingdom

In 2006 the European Union introduced regulations (WEEE) for the collection and recycling of all waste electrical and electronic equipment. It is no longer permitted to simply throw away electrical and electronic equipment. Instead, these products must enter the recycling process.

Each individual EU member state has implemented the WEEE regulations into national law in slightly different ways. Please follow your national law when you want to dispose of any electrical or electronic products. More details can be obtained from your national WEEE recycling agency.

Germany

Die Europäische Union hat mit der WEEE Richtlinie umfassende Regelungen für die Verschrottung und das Recycling von Elektro- und Elektronikprodukten geschaffen. Diese wurden von der Bundesregierung im Elektro- und Elektronikgerätegesetz – ElektroG in deutsches Recht umgesetzt. Dieses Gesetz verbietet vom 24. März 2006 an das Entsorgen von entsprechenden, auch alten, Elektro- und Elektronikgeräten über die Hausmülltonne! Diese Geräte müssen den lokalen Sammelstellen bzw. örtlichen Sammelstellen zugeführt werden! Dort werden sie kostenlos entgegen genommen. Die Kosten für den weiteren Recyclingprozess übernimmt die Gesamtheit der Gerätehersteller.

France

En 2006, l'union Européenne a introduit la nouvelle réglementation (DEEE) pour le recyclage de tout équipement électrique et électronique.

Chaque Etat membre de l' Union Européenne a mis en application la nouvelle réglementation DEEE de manières légèrement différentes. Veuillez suivre le décret d'application correspondant à l'élimination des déchets électriques ou électroniques de votre pays.

Italy

Nel 2006 l'unione europea ha introdotto regolamentazioni (WEEE) per la raccolta e il riciclo di apparecchi elettrici ed elettronici. Non è più consentito semplicemente gettare queste apparecchiature, devono essere riciclate. Ogni stato membro dell' EU ha tramutato le direttive WEEE in leggi statali in varie misure. Fare riferimento alle leggi del proprio Stato quando si dispone di un apparecchio elettrico o elettronico.

Per ulteriori dettagli fare riferimento alla direttiva WEEE sul riciclaggio del proprio Stato.
