	Voice mail		Volume status

Getting Started

Used as a Mouse and a Hi-Fi Speaker

Plug the Skype Mouse into the USB port of your PC and you can use it as a mouse and a Hi-Fi speaker now.

Used as a VoIP phone

To use it as a VoIP phone, you need to install some needed softwares as shown below:

Step 1: Install the Latest VoIP Applications

The latest version of Skype (Version 2.0 or above) is strongly recommended. You can download it from Skype's official website:

<http://www.skype.com/download/skype/windows/>

Other VoIP applications can be downloaded in the following websites:

VoipBuster	http://www.voipbuster.com/en/download.html
VoipStunt	http://www.voipstunt.com/en/download.html
VoIPCheap	http://www.voipcheap.co.uk/en/download.html
VoipDiscount	http://www.voipdiscount.com/en/download.html
SparVoip	http://www.sparvoip.de/de/download.html
Internetcalls	http://www.internetcalls.com/en/download.html
NetAppel	http://www.netappel.fr/fr/download.html
FreeCall	http://www.freecall.com/en/download.html
WebCallDirect	http://www.webcalldirect.com/en/download.html
VoipCheapCom	http://www.voipcheap.com/en/download.html
Poivy	http://www.poivy.com/en/download.html

Step 2: Install the Latest Skype Mouse Driver

You can insert the supplied installation CD into your PC or download the latest version of Skype Mouse driver from <http://www.skyu2m.com/download/SkypeMouseSetup.exe>.

When the Skype Mouse driver runs for the first time, Skype will pop up the following window. Please select "Allow this program to use Skype" as the illustration shown below:

Now, the LCD screen will be shown as below and you can see a green icon  in the task bar which indicates you are ready to make/receive calls with the Skype Mouse.

Driver Icons	Indications
 (Green)	The mouse works normally.
 (Grey)	The mouse fails to communicate with VoIP applications. (Please refer to “ FAQ ” Q1 in this manual)
 (Red)	The mouse fails to communicate with your computer. (Please refer to “ FAQ ” Q2 in this manual.)

Step 3: Activate a Needed VoIP Application

- ① Press the key  (Menu) and use  to choose "Active VoIP"

- ② Press  (OK) and you can see the below icons in your PC screen:

- ③ Press  to select the needed VoIP application

- ④ Press  (OK)

Note: There is another way to activate the needed VoIP applications

Right click the driver icon  and "Active VoIP", and choose the application that you want to use.

Step4: Set the Intelligent Router for SkypeOut

There are some other famous VoIP applications except Skype providing cheaper or free VoipOut service for subscribers. The “Intelligent Router for SkypeOut” is designed for you to enjoy this cheaper or free VoipOut services when you make a SkypeOut calls. You can set the “Intelligent Router for SkypeOut” as follows:

Right click on the driver icon , choose “Options” and go to “VoIP Application” panel.

Now whenever you make a SkypeOut call, the call will be routed to the selected VoIP service automatically.

To make a free VoIP calls, you can click “Use a FREE VoIP service to make SkypeOut calls”. If the free VoIP service is unavailable, the SkypeOut calls will be made thru SkypeOut service.

If you click both “Use a FREE VoIP service to make SkypeOut calls” and “Use the below VoIP service to make SkypeOut calls”, the SkypeOut calls will be routed to the selected VoIP service if the free VoIP service is unavailable.

Update the Skype Mouse Driver

Please remember to update the Skype Mouse driver regularly. You can follow this guideline here:

Right click the icon  and choose “**Check for Update**”.

Or you can enable your driver to check for update automatically in the driver’s panel as follows:

- ① Right click the icon , and choose “**Options**”.

- ② Go to “**General**” panel and check before “**Check for update automatically**”.

The Call Functions

Make a VoIP call

There are two ways to make a VoIP call.

1. Use the hands-free function to make a VoIP call.

- ① Press    to activate a VoIP window
- ② Use your mouse wheel to scroll up/down the VoIP contact list to select the contact.
- ③ Click on the “Call” button on Skype window to make the call.

2. Use the phone keypad to make a VoIP call

- ① Open the mouse
- ② Use  on your mouse to scroll up/down to select the contact.
- ③ Press  to make the call.

Note:

Or you can use Speed-dial number to make calls.

- ① Open the mouse.
- ② Dial the Speed-dial number and press  to make the call.

Example:

Supposed you want to make calls to this Skype contact. Please dial:

“02” + 

Note: For how to assign Speed Dial for your contacts, please refer to “FAQ” Q5 in this manual.

Redial a VoIP call

Press  to activate the redial contact and press  or  to make the call.

Make a SkypeOut call

- ① Open the mouse and press  + "country code" + "city code" + "phone number".
- ② Press  to make the call.

Examples:

(Here we use the country code "1" for calling USA): + 1 555 1234567

Note: For more detailed usages of making a SkypeOut call, please visit Skype's official website: <http://www.skype.com>.

If you input a wrong number, please press  to clear it.

Receive a VoIP call

There are two ways to receive a VoIP call:

1. Use the hands-free function: Directly press the button   .
2. Open the mouse or press  to receive calls.

End a call

Close the Phone, or Press  or    to end a call.

Other Functions

Select a Chord Music Ring Tone

To select your favorite chord music ring tone, please right click the tray icon , choose "Options" and go to "Advanced" panel.

Check Call History and Voice Mail

- ① Press  (Menu Key)
- ② Use  to choose Call History and press  (OK)
- ③ Use  to choose Incoming/Outgoing Calls, Missed Call or Voice Mail, and press  (OK)

Adjust Volume for Speaker

The operation for adjusting volume for speaker alters according to the following two situations.

When the Mouse is	Picture	Operation
Opened		Scroll the mouse wheel and you can see the volume status icon  in the LCD screen.
Closed		Press  .

Set LCD Display

Please right click the tray icon , and choose "Options..."

FAQ

For latest information about the Trouble Shooting and the FAQ, please visit
<http://www.skyu2m.com/support.htm>

Q1: Why did I see the grey icon  rather than  in the taskbar? What's wrong with the driver software?

► If you see the icon ,

1) please check whether there is any VoIP program running at the moment. If not so, please run at least one;

2) If you have run Skype, please check whether you can see the icon  in the Skype Windows.

But if you cannot see this icon, please follow the steps:

Step1: "Tools" — "Options".

Step 2: “Privacy”--“Related Task: Manage other program’s access to Skype”.

Step 3: Choose “Change”

Step 4: Choose “allow this program to use Skype”

Q2: After turning on the computer, I see the red icon . Why?

▶ When you see the red icon , please go to your PC's **Device Manager** (“**Start**”—“**Setting**”—“**Control Panel**”—“**System**”—“**Hardware**”—“**Device Manager**”) to find whether the following four devices are in a normal state.

“**USB Human Interface Device**”

“**USB Audio Device**”

“**USB Composite Device**”

“**HID-compliant mouse**”

Usually, after plugging the mouse in the USB port of your PC, you can find these four devices when you run the VoIP applications and Skype Mouse driver. If there is a **question mark** or an **exclamation mark** before any one of these device, then the USB port of your PC is in an abnormal state. Please check the USB port of your PC.

Q3: When I was answering a call, the Hi-Fi speaker continues playing music. It was quite annoying. What can I do?

► You can tackle your problem in the Skype panel.

Step1: “Tools” — “Options”.

Step2: “Advanced” —Check before “Automatically pause Winamp during calls” and click “Save”

Q4: If I had opened my mouse to receive the call, what should I do when I want to close the mouse to use the hands-free function and continue the call with my VoIP friends?

► During a VoIP call you can press the side button  to switch to the hands-free mode. When you see “HF” on the top-middle line of the following LCD screen, you can close your mouse and enjoy the hands-free function.

Q5: How to assign a Speed-dial number for my contact?

► You can assign Speed Dial number for the contacts directly on the related VoIP application's panel. Here we take Skype for example.

Right click on the selected Skype contact and choose *"Set Speed-Dial"*

Now you can use the Speed Dial number to make Skype calls.
