NEC Electronics Product Information
for μ PD720133

Dear NEC Electronics Engineering Supporters,

We will inform you about the product information as attached document described more details.

Yours sincerely,

USB Technical Marketing Group
PC Peripheral Systems Division
2nd Systems Operations Unit
NEC Electronics Corporation

A handwritten signature in black ink, appearing to read "Y. Tomoda", is written over a horizontal line.

μPD720133 Button Application software version 1.0 Release Note	IBB-2UE-00029
	May 27, 2005
	Yoshiyuki TOMODA, Department Manager USB Technical Marketing Group PC Peripheral Systems Division 2nd Systems Operations Unit NEC Electronics Corporation

CP(N), O

1. Outline of the application software

This application software can execute the following three functions by pushing a button, which is connected to GPIO pin, on μ PD720133 evaluation board ET-0182. Please note that the three functions can be executed with a button. One function needs one button, in other words, one GPIO pin.

(1) Unplug

This function enables safely removal of USB device without having to execute unplug tool on task bar.

(2) Call Application

This function can launch application software which was selected by a user.

(3) Backup

File copy is executed.

Please refer to user's manual (ISG-2UE-00041) for detailed functions

2. Release files

The following application software is provided.

- Installer Execution file : install.exe 274,432 Byte
- Installer Data file : install.cab 1,360,382 Byte

3. Preparation

Please prepare the following devices for usage of this software.

- ET-0182
- Hard disk drive

For this software's operation, please use EEPROM data containing default Vendor ID and Product ID (VID: 0409h, PID: 0056h). If other VID and PID are used, this software will not work.

For settings of EEPROM data and ET-0182, please refer to user's manual (ISG-2UE-00041).

4. In case that customers bundle this software with their products

If customers would like to bundle software with their product, they must agree to a license agreement at first. After agreeing, our group will change settings in this software such as VID and PID. Then customized software will be provided for customers.

For customization items available, please see an attachment.

And also, please proceed for providing customized software as the following procedure.

NOTE

This sample software cannot be attached on customer's product. Description on this is in license agreement which is displayed in installing.

Procedure for providing

- (1) Customers check operation of this sample software on their system.
- (2) Customers submit a customization requirement sheet (see attachment) to local sales.
- (3) Customers agree to license agreement which includes the following contents.

Regarding contract with customers except for in Japan, NECEL local sales contract with them. After signed, please send a copy of signed agreement to us.

We will provide license agreement form.

- 2.1 Subject to the terms and conditions set forth herein, NEC grants to LICENSEE a non-exclusive, non-transferable, royalty-free, paid-up license, with no right to sublicense to others (except as expressly set forth below):
 - (1) to reproduce, and/or have reproduced, incorporate and/or have incorporated into Target Products and distribute as a part of Target Products, Licensed Program in object code form;
 - (2) to use, have used, reproduce, have reproduced, modify, have modified, translate, have translated, edit, have edited, and/or distribute Licensed Documentation only to the extent reasonably necessary to exercise the license granted in sub-sections (1) above.
 - 2.2 Except as expressly provided herein, no rights or licenses shall be granted to LICENSEE in connection with Licensed Software.
 - 2.3 Nothing contained herein shall transfer or be deemed to transfer to LICENSEE any title, interest or intellectual property rights in Licensed Software, which shall remain an exclusive property of NEC and/or licensor(s) of NEC.
- etc...

- (4) We customize this software.
- (5) Customized software is provided for customers.

CUSTOMIZATION REQUIREMENT SHEET

The following customizations of PC Application are required:

Company Name	
Department Name	
Name	

Customization item	Request
Software name	
Software version	
Function selection (Unnecessary functions cannot be removed from this software.)	Unplug : Use / Not use Backup : Use / Not use Call Application : Use / Not use
Function assignment to GPIO	GPIO5: GPIO6: GPIO7:
GPIO Active Level	LOW-Active or HIGH-Active
Customer's Device ID	0x
Customer's Product ID	0x
Copyright Description	
Icon	Change / Not Change Please provide an icon file.
Open Window	Use / Not use Please attach an image (bmp file) if change the current design.
Replacement of License agreement	Please attach the file of rtf form.
Installation folder name
